JUNIOR DEVELOPMENT CONSULTANTS in mySAP Business Suite

ecenta AG is a software and consulting company focused on the solution of mySAP Business Suite including consulting for both business processes and technical issues. Our main emphasis is mySAP Customer Relationship Management (mySAP CRM), SAP NetWeaver Business Intelligence, SAP NetWeaver Master Data Management, and SAP Netweaver Exchange Infrastructure. Based in offices in Walldorf (Germany), Singapore, Caracas (Venezuela) and Seattle (USA) we work jointly with well-known large-scale enterprises all over the world.

What you will do at ecenta

For our newly-built subsidiary in Malaysia, we are looking for applicants in order to strengthen our current and future project assignments. As a development consultant, you will mostly be developing SAP solutions remotely from Malaysia. You will undergo an initial 3-month period of basic training, and you will later have the opportunity to work on projects on-site at the client location.

What ecenta will do for you

You will learn a lot about business processes, the setup of big implementation projects and the technology of SAP products. Our working environment features a very creative, informal atmosphere where we have a constant and fertile relationship with various development departments of SAP throughout the world. You will also find time to expand your knowledge in order to obtain SAP certificates. Naturally, your salary will be in line with market standards including components based on your personal performance.

What ecenta expects from you

You have successfully finished your studies in Computer Science, Information Systems or any other studies with similar emphasis. You are interested in solving technical issues and bringing up creative solutions in the area of SAP. In addition, you are at least mastering one programming language, preferably ABAP, C++ or Java. You have distinctive analytical skills and the right intuition for handling both clients and end users. You show willingness to learn in order to be ahead of the "state of the art". You speak English fluently and you are eager to operate worldwide.

We are looking forward to receiving your job application (incl. a photo). It should be sent preferably via email and should indicate the first possible date of entry and your salary expectation. There will be an interview round by February/March 2007, to be held in Kuala Lumpur and Singapore.
